

MITCHELL DEFENSE

"RAT DOG" LINE

RELIABILITY MEETS PERFORMANCE

The "Rat Dog" got its name from a SARC (Special Amphibious Reconnaissance Corpsman) who is known to thrive in the suck and stay in the fight no matter how dirty or tired. The whole Mitchell Defense line up is built around reliability. The Rat Dog is no exception. This rifle was designed to be the most reliable and functional PCC on the market. Featuring a two-stage trigger that is built specifically for the PCC and won't break due to increased stress from a blowback gas system. Adding a lipped buffer tube, flat wire spring, and a properly weighted buffer all came together to make an extremely reliable and enjoyable PCC.

BILLET LOWER

- Precision machined from solid billet 7075 T6 aluminum with the same level of OCD found in all our rifles.
- Flared mag well for faster reloads under stress and designed for Glock style magazines.
- Enhanced buffer tube features
- Position drain holes to that easily removes water in maritime environments and prevents build up of gas and creating smoother cycling of BCG.
- Carrier support extension that guides BCG into the extension prohibiting carrier tilt and excessive carrier wear while holding the buffer pin in place and making backing out under recoil impossible.
- Rat Dog specific buffer and stainless steel cryo treated flat wire buffer spring that eliminates "twang" noise and increasing forward pressure which greatly increases reliability while feeding rounds.
- Timney PCC two stage trigger built to withstand the abuse of a direct blowback system.
- QD insert on the endplate.

BILLET UPPER

- *The dedicated PCC upper is precision machined from 7075-T6 Aluminum to exacting tolerances to perfectly house the PCC BCG.*
- *Billeted from a solid piece of aluminum to match perfectly with our PCC lower receiver and have a flat surface for a properly seated barrel that is inline with the upper.*

THE BCG

- *Meticulously machined as a solid piece bolt for improved reliability and to handle the stress of a direct blow back system.*
- *Finished in black nitride for superior lubricity, corrosion protection, and durability.*
- *Full auto capable.*
- *AR15 style extractor.*

**MITCHELL
DEFENSE**

THE "PATROL DOC"

THE BCG

- Precision Ground
- Finished in Armor Lube DLC.
- Bolt is 9310 steel and properly heat treated, MPI and shot peened.
- 100% American made and full auto capable.

BILLET LOWER

- 7075 T6 aluminum
- Solid piece trigger guard
- Flared mag well
- Enhanced buffer tube
- Smooth as butter buffer system
- Radian ambi safety selector
- Right side bolt release
- Geissele 2 stage SSA trigger
- QD mount on end plate

CASE

- Bulldog Tactical 36" soft case

BILLETED UPPER

- 7075- T6 aluminum
- Thermal fit upper to barrel
- 10.3 Precision barrel
- SUB MOA accuracy
- Radian Ambi charging handle

HANDGUARD

- 9" 6061 T6 aluminum
- Top rail 1913 picatinny
- Mlok 3,6,and 9 as well as offset 45's
- Quad rail available
- QD attachments on front and back

COATING

- E series Cerakote Black
